

ICHTHYS

Enhancing Sea Food Quality and Shelf-life

Newsletter 6 - October 2024

Three new partners have joined ICHTHYS!

UNIVIV (P18) is a research company based in Ireland that aims to bring to market safer and innovative technologies adaptable across species and sectors, including human and animal health and the Environment, with a focus on the One Health Triad. Find out more at <https://univiv.com>

Felxia (P19) is a in Greece that provides innovative packaging for foods. The company utilizes cutting edge state-of-art technologies coupled to standard manufacturing procedures to develop integrated solutions for the market with a strong R&D component. Find out more on <https://www.flexia.gr/en/>

Blue Island (P20) is a fish and fry farming and fresh fish trading company localized in Cyprus. The main species produced and commercialized are Sea bass, Sea bream and Meagre. Blue Island handles more than 3000 tons of fish a year and process and package fresh fish for customers in Cyprus and around the world. Find out more on <https://blue-island.com>

ICHTHYS Project Team Shares Research Insights Globally!

The ICHTHYS team has been actively disseminating research findings through participation in conferences and workshops. These events—spanning national, international, and European levels—featured contributions from both junior and senior team members, fostering a dynamic exchange of ideas and knowledge within the scientific community. Additionally, the team has published one book chapter and 15 research articles in prestigious international journals. Check out where we have been and our research work at [https://www.ichthys-eu.org/!](https://www.ichthys-eu.org/)

Our impact at schools

As part of an anonymous evaluation, 59 students aged 10-16 shared their feedback on the ICHTHYS Outreach program. The survey results show that 78% of these young participants value the scientific research conducted by the ICHTHYS project and 67% report that they are rethinking their daily habits to reduce food waste and spoilage in the future.
